To: Prison University Project

I want to start this letter off by saying "I appreciate the care package, very thankful for the items that came in it"

Covid-19 the new virus on the block. To read and find out there's other types of Covid just less fatal, I feel like U.S. should had been prepared a lot more for something like this to occur. I don't feel like the transferring from bats is enough information, I think the question is how did it evolve into something this epic? We must have missed something decades ago.

do think this ~~is~~ should be a make up call for the world especially U.S. Would our Government realize that there's far more greater problems out there to worry & pay attention too other than War and conflict?

As of prison the worst thing is being stuck in reception without movement to

a Mainline which limit our priveledges by a lot and our canteen because the caution of shipment of food which I highly don't understand. Other than that I really can't complain because the free world is going through way more problems and difficulties than being in Prison now. "I wish the prison supplied us with more of the updates and news on the progress of the Covid 19."

It can't imagine how people is dealing with not being able to go to work or to a park with your kids or even wearing a mask everytime you step out your house, then the worst part is getting fined if you forgot it. I hope that's not what happens.

If it's something I do know that we will adapt, we will recover and we will progress.

I want to end this letter with Good Spirits. I send my Condolences to the one's that lost love ones to this virus. I salute to the one's that's helping. I'm proud of the ones' that's adjusting and not making it.

harder. I send my love for those who
need uplifting.

So lets STOP BLAMING Eachother and
Come Together, Unite, Solve this Problem...

LOVE & Misses my Kids a Family

"As long as my letter don't be minimize,
as for taking out certain parts, and only revise
for punctuation and spelling then I would
agree with allowing it on the SITE.
