Hi, my name is Ari Morales and I'm writing you from (Corcoran State Prison), and I was made aware of the help & support you have provided to the Inmate Population at San Quentin and it's just an amazing thing to hear how there is still people who show that they care for the incarcerated especially during times like this, I also understand that by you putting forth an effort to help those who are in desperate situations in prison by sending them a gift package, now even though I'm not in S.Q., I have to say that it takes a human who breathes, shares, cries, laughs and cares to even do what you have done and as is obvious your action has had a ripple effect to the ears of those in other prisons. But this letter is just to say that you have made a difference by a small action to those you probably have never met and believe me when I say that there are people in prison in desperate situations, who never receive anything from anyone. I have seen & witnessed that alot throughout the years, people who just need a helping hand and it's like if you have just breathed life back into them as if they have just been resurrected, so again I say thank you for being human!" P.S. you can do what you wish with this letter share it, post it etc. it's yours!" & GOD Bless
